

Cloud Management Platform

Save up to 70% on AWS

A high-level look at how we cut your cloud bill — without cutting performance.

Reliable

Secure

Built for Enterprise

Umbrelly

Cloud bills grow faster than anyone plans for

As you scale on AWS, cost sprawl compounds quietly. Most teams only notice once the invoice hurts.

30–40%

of cloud spend is typically wasted on idle, over-provisioned, or forgotten resources.

Opaque

billing makes it hard to know which teams and workloads drive the bill.

No time

engineering teams are shipping product, not hunting for savings line by line.

About us

Umbrelly

HQ

Incorporated and headquartered in Delaware, United States.

30+

Cloud talents: DevOps, FinOps & SecOps engineers.

\$20M+

Annual cloud spend under management.

5 / 5

Reviewed on Product Hunt.

Umbrelly

Backed by official cloud partnerships

We work where you already run. Certified across the three major clouds.

Umbrelly

What is your cloud's current status?

We start by understanding four things. No access required to begin the conversation.

AWS Spendings

Where the money actually goes, month over month.

AWS Planning

Roadmap, commitments, and reserved capacity.

Account Structure

Organizations, SSO, and billing hierarchy.

Optimization Attempts

What you've already tried — and what stuck.

Umbrelly

Information request

A quick, ~15-minute account connection is all we need to confirm real savings.

- PDF export of your billing data for last month's usage
- Check your organization structure through screen share
- SSO, Identity Center check
- Currency, region, taxes
- Kubernetes footprint
- Other custom questions

Umbrelly

How it works

Four steps from first call to a lower bill — and it keeps working every month.

01

Connect

Read-only access or a billing export. ~15 minutes, no downtime.

02

Analyze

Our FinOps engine maps every dollar to a workload and finds the waste.

03

Optimize

Rightsizing, commitments, and cleanup — applied safely, with you in the loop.

04

Report

Transparent monthly savings. You only pay on what we actually save.

Umbrelly

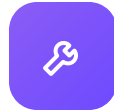

One team across FinOps, DevOps & SecOps

30+ cloud engineers managing \$20M+ in annual cloud spend.

FinOps

Cost visibility, rightsizing, Savings Plans & RIs, and anomaly alerts.

DevOps

Infrastructure tuning and automation that holds the savings in place.

SecOps

Identity, guardrails, and account hygiene baked into every change.

Umbrelly

Example estimate · 28 May 2026

**–9.14% off every month, your AWS bill drops
from \$135,226 to ~\$122,860**

And to get you started — extras for new accounts:

**\$27,000 in AWS credits**

Your first 3 months, to fund new initiatives.

**Sign-up bonus**

Exact terms and how much you get TBD during the demo call.

[Book a 30-min call](#)

High-level estimate based on current monthly usage. Not a binding quote — final savings are confirmed after a quick (~15-min) account connection. Performance-fee items are charged only on realized savings.

Umbrelly

Why teams choose Umbrelly

Pay only on realized savings — incentives fully aligned.

No rip-and-replace: we optimize the AWS you already run.

Security-first changes, reviewed with your team.

Transparent monthly reporting you can hand to finance.

Let's find your savings.

A 30-minute call and a ~15-minute account connection is all it takes to see a real number.
